

# Learning to use FMEA

**Wednesday 2nd November 2005**

**Arvin Meritor**

**2, Enfield Industrial Estate**

**Redditch B97 6BH**

Calling all engineers and managers – learn how to design-out failures and produce reliable, safe and ‘customer pleasing’ products for just one day of your time!

With customers placing increasing demands on companies for high quality, reliable products it is vital that these two ‘given’ requirements are incorporated as early as possible in the development cycle.

The more traditional route is the use of costly extensive testing and probabilistic reliability modelling much later in the game.

An obvious option is the adoption of Failure Modes and Effects Analysis (FMEA) – a methodology for analysing potential reliability problems early in the development cycle when it is easier to take actions to rectify problems thus enhancing reliability through design.

This workshop, supported by the European Social Fund, is an excellent opportunity to learn how to use FMEA early and consistently in the design process.

Don't miss this opportunity...book now and take advantage of this excellent opportunity for FREE funding

*Formed in 1990 and based at the University of Birmingham, Euromotor is a network and partnership of European car manufacturers, suppliers and universities. Euromotor's objective is to improve the knowledge base of the European motor industry through high-level technical collaborative training.*

*Those involved in organising this particular Workshop are fellow automotive manufacturers who are already delivering quality components to the automotive industry – your peers.*

# AutoTrain CoDesign FMEA Workshop

Wednesday 2nd November 2005

Arvin Meritor, 2 Enfield Industrial Estate, Redditch B97 6BH

## Registration form (this form may be photocopied).

Please apply early as places are limited. Thanks to subsidy from the European Social Fund, this course is FREE OF CHARGE for West Midlands automotive SMEs. Cost for others is £50 per person.
